

# NOKOMIS ENERGY

## COMPANY OVERVIEW

### Company Overview

Nokomis Partners is a Minneapolis based energy developer with a mission to accelerate local energy adoption through equitable partnerships. Our approach is predicated on creating value for all stakeholders involved in a project. We specialize in understanding the full development process from origination, to technology, to long-term operation.

### Our Team

Our value comes from our 25+ years of combined experience, in market resources and partnership approach. Through a combination of development and consulting services we use distributed energy to deliver economic and social benefits to local communities.

Spread access  
to stable,  
low-cost energy

Create  
sustainable  
energy

Improve  
community  
infrastructure

Contribute to  
the local  
economy

### Community-Scale Solar

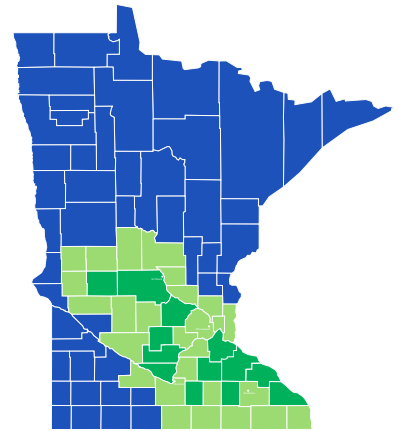

Nokomis Energy has developed over 20 MWs for the Xcel Community Solar Garden Program in Minnesota alone. We continue to demonstrate a commitment to siting projects that fit in the communities they serve and delivering savings to clients at rates competitors can not match. Our landowners are a valuable part of our process and the permitting authorities we work with are many of our best references, because when you work with Nokomis Energy, you get a long-standing partner. We take pride in our work and our reputation is very important to us.
