

Project Developer

Nokomis Energy is a Minneapolis based energy developer with a mission to accelerate local energy adoption through equitable partnerships. Nokomis is seeking project developers to support Nokomis' growing portfolio of clean energy projects across the upper Midwest through identification of suitable sites, zoning, permitting and negotiating transactional documents. This individual will also focus on leading development through forging relationships with landowners, community leaders, utilities and stakeholder organizations

Essential job functions include:

- Overall development of 1+MW solar projects from origination through financing NTP
- Create and manage development budgets
- Identifying, contacting, proposal and contracting for site control/land assemblages
- Evaluation and resolution of title issues
- Managing conditional use and other discretionary permitting
- Managing interconnection
- Reporting on project status, spend and risk to Nokomis leadership on a regular basis
- Identifying and initiating contact with key off-takers
- Identifying key execution partners in market
- Identifying opportunities for obtaining incentives from local jurisdictions
- Support utility coordination
- Support handoff to construction

Location: Minnesota, Wisconsin, Iowa

Terms of Employment: Full-time, salary \$60-150K+ based on performance

About Nokomis –

Our approach is predicated on creating value for all stakeholders involved in a project. We specialize in understanding the full development process from origination, to technology, to long-term operation. Our value comes from our principals having been active in energy development since 2007, in-market resources and partnership approach. Through a combination of development and consulting services we use distributed energy to deliver economic and social benefits to local communities.
